EXPERIENCE

Senior Software Engineer

November 2023 – April 2024

FerretDB, Inc.

Remote

- Worked as a contractor for a truly open-source MongoDB alternative, built on PostgreSQL and Go.

Senior Software Engineer

August 2022 – April 2023

Form3

Remote

- Worked in the Core Data team of the London-based Cloud-native Payment Processing Platform Form3 on internal services that handle payment and payment returns.
- Experience with Go, gRPC, NATS, PostgreSQL, Kubernetes, Terraform, and multi-cloud environments.

Senior Software Engineer

February 2021 – July 2022

Stitch, PVH Corp.

The Netherlands

- Led a comprehensive project to enhance developer experience, ensure reliability, improve efficiency, and reduce operational costs by planning and implementing a robust automated testing infrastructure with fast integration tests (2s on average for the entire test suite) and replacing a non-relational database with PostgreSQL and Elasticsearch/OpenSearch, yielding a remarkable impact: a lasting expense reduction of over 90% of our recurring database cloud computing and licensing expenses and enhanced software development efficiency throughout multiple teams.
- Worked on data migration of media assets from renowned fashion brands, including internal clients such as Tommy Hilfiger and Calvin Klein and external ones such as Havaianas and Scotch & Soda.
- Experience with Go, gRPC, GraphQL, Kubernetes, Terraform, and Amazon Web Services.

Senior Software Engineer

June 2019 – January 2021

HousingAnywhere

The Netherlands

- Worked on diverse areas, including public-facing APIs, internal services, integration with affiliate partners, and payments and payouts infrastructure.
- Experience with Go, gRPC, Google Cloud Platform, Kubernetes, and microservices.

Senior Software Engineer Software Engineer

January 2018 – May 2019

March 2014 – December 2017

Liferay, Inc.

Brazil

- As a key member of WeDeploy / Liferay DXP in its early days, led the development of its CLI tool, which was the primary client developers utilized to access and use the platform.
- Developed sophisticated solutions using Go and JavaScript for front and backend libraries and applications, such as reverse-engineering the socket.io protocol to use it for emulating an SSH connection.

EDUCATION

Bachelor of Science in Computer Science

October 2013 – December 2017

Universidade Federal de Pernambuco

HIGHLIGHTS

Open source libraries and contributions: Go standard lib: signal.NotifyContext, <https://henvic.dev/opensource/>

Portfolio: Vehikel, DXP Cloud CLI, httpretty, and others on <https://henvic.dev/portfolio/>

Talks: <https://henvic.dev/talks/>

Interests: Open-source software, Photography, Nature, Travel, Drones, Industrial design, Homelab, Airplanes.

Keywords: HTTP(S), gRPC, REST API, Go, JavaScript, Java, Unix scripting, cloud computing, Kubernetes, CI, SQL, PostgreSQL, OpenSearch, Elasticsearch, Terraform, Grafana, Security, dev tools, DNS, networking, Linux, macOS, FreeBSD, VMware ESXi.
